

Nuclear Structure 2022

June 13-17, 2022 - Berkeley, CA

Dear Colleagues,

We would like to invite you to join us for the Nuclear Structure 2022 conference (NS2022), in person and on-site at Lawrence Berkeley National Laboratory, from June 13-17, 2022. This is the 18th meeting in the Nuclear Structure series, following the 2018 conference held in East Lansing, MI and after the cancellation of NS2020 due to the COVID-19 pandemic. We are assembling an exciting scientific program, focusing, as is tradition, on recent experimental and theoretical research on atomic nuclear structure at the limits of mass, isospin, excitation energy, and angular momentum.

Registration is now open, and will remain open until June 1, 2022 at the conference website - <https://conferences.lbl.gov/e/NS2022>. Please note that we are asking virtual attendees to pay a registration fee, the majority of which will go toward supporting student attendees.

Stay tuned for program updates in the next few weeks before NS2022, we look forward to seeing you in Berkeley!
